Description

Henry #204® Plastic Roof Cement is a premium, trowel-grade sealant for dry surfaces. Made from heavy-bodied asphalt, Henry #204 spreads easily. It forms a tough film that won’t become brittle and crack in the coldest weather, or run and sag in the hottest. The outstanding handling properties and durability of this product come directly from its reinforcement with encapsulated chrysotile asbestos. This mineral fiber, when encapsulated in asphaltic roofing products, is recognized as harmless by the US EPA, OSHA and Consumer Product Safety Commission.

Uses

• Repair holes, cracks and splits on composition, mineral surface cap sheet, asphalt coated, SBS modified and metal roofs.
• Seal leaks and openings around flashings, chimneys, vents, skylights, joints in metal edging, gutters, etc.
• Use for 3- or 5-coursing bituminous flashings.
• Seal metal flanges to roof membrane.
• Seal flashing pans around roof penetrations.
• Adhere bituminous base flashings.
• Seal cracks in exterior side of below-grade concrete and masonry walls and foundations.

Surface Preparation

Henry #204® is ready to use. Do not thin. In cold weather, store 24 hours at room temperature prior to application, or use Henry #505 FlashMaster™. Do not heat container. Surface must be clean and dry. Cut away old roof cement if it prevents a smooth patch. Remove rust and scale from metal by wire brushing. Sweep area thoroughly to remove all gravel, dust, dirt and other foreign matter that would interfere with a good bond. To achieve a better bond on new or previously uncoated concrete, masonry or metal, prime with Henry #103 or #104 Asphalt Primer. Also prime surfaces which are very dusty, rusty, or highly absorbent.
#204® Plastic Roof Cement

**Application**
Repair cracks, breaks, tears and holes by applying 1/8" to 1/4" thick with a trowel or putty knife. Work the cement into the crack or break and spread it 2"-4" beyond, feathering the edges. For best results, embed polyester fabric or open mesh glass fabric to reinforce the cement, then cover with additional cement.
Gravel Roofs: Remove embedded gravel before making repair.

**Precautions**
On wet surfaces, use Henry #208® Wet Patch® Roof Cement. Do not heat container or store at temperatures greater than 110°F. When transporting this product, be sure the pail is secured and the lid is tight. Do not allow pail to tumble as this may loosen the lid and allow leakage to occur. CLOSE AIR INTAKES ON ROOF UNTIL SOLVENTS DISSIPATE! This mastic is not recommended for use on APP-modified systems (torch down), over gravel, rubber or PVC sheet roofing, wood shingles or flashings. To extend the life of the mastic, after it has weathered 30 days coat with Henry #220® AlumiTop®.

**Clean Up**
Remove cement from tools, etc., with kerosene, paint thinner or mineral spirits. Clean hands with a waterless hand cleaner.

**Caution**
CAUTION! COMBUSTIBLE! Contains petroleum distillate. Keep away from heat and flame. Do not heat container or store at temperatures greater than 110°F. CLOSE AIR INTAKES until solvents dissipate. Contains volatile solvents that might contaminate potable water. Close container after each use. Dispose of container and unused contents in accordance with Local, State and Federal regulations. DANGER! HARMFUL OR FATAL IF SWALLOWED! If swallowed, do not induce vomiting. CALL PHYSICIAN IMMEDIATELY! Use protective measures to avoid contact with eyes and skin. In case of eye contact, open eyelids wide and flush immediately with plenty of water for at least 15 minutes. GET MEDICAL ATTENTION! USE ONLY WITH ADEQUATE VENTILATION! Avoid breathing of vapor. If you experience eye watering, headaches or dizziness, leave area or increase fresh air or wear respirator (NIOSH/MSHA TC 23C or equal). Repeated and prolonged occupational overexposure to solvent vapor may cause permanent brain and nervous system damage, and may cause liver or kidney damage. KEEP OUT OF REACH OF CHILDREN.

WARNING: This product contains detectable amounts of chemicals known to the State of California to cause cancer, or birth defects or other reproductive harm.

EMPLOYERS should obtain a copy of the Material Safety Data Sheet (MSDS) from your supplier or directly from Henry at the toll free number or website below.

NOTE: This coating, like all asphalt-based products, forms a small amount of water soluble material as it weathers. Normally this is not noticeable because the rain washes it away. However, roofs having a pitch less than 1/2" per foot, or ones having poor drainage, will accentuate the problem by concentrating the water soluble material in low spots. If there is no rainfall, hose these roofs off to remove the water solubles. Frequent inspection of these roofs is recommended because abnormally rapid deterioration of any roofing material may occur where water stands for long periods.

**Limited Warranty**
We, the manufacturer, warrant only that this product is free of defects, since many factors which affect the results obtained from this product — such as weather, workmanship, equipment utilized and prior condition of the substrate — are all beyond our control. We will replace at no charge any product proved to be defective within 12 months of purchase, provided it has been applied in accordance with our written directions for uses we recommended as suitable for this product. Proof of purchase must be provided. DISCLAIMER OF WARRANTIES: The Limited Warranty is IN LIEU OF any other warranties express or implied including but not limited to any implied warranty of MERCHANTABILITY or fitness for a particular purpose, and we, the manufacturer, shall have no further liability of any kind including liability for consequential or incidental damages resulting from any defects or any delays caused by replacement or otherwise.

Maximum VOC = 300 grams per liter.
